

Building a global, student-led policy incubator, Bringing young people together with policy-makers and Giving them a voice in shaping the future of European and Transatlantic Relations: **European Horizons' mission since 2015**

European Horizons is the very first credible initiative to establish a student-led policy incubator addressing some of the most pressing global issues of our time. By giving a voice to students coming from three continents, it is our ambition to provide a comprehensive blueprint addressing the full range of transatlantic and EU policy-related issues. Our interdisciplinary, non-partisan political approach is embedded in a wide range of initiatives, bringing the content of European Horizons into the realm of policy-making, media and research. Conceived both as a physical and virtual space for dialogue, our organization aims to guide the transatlantic debate by empowering the voice of the youth.

Our Mission: Rethinking Youth Engagement and Transatlantic Relations Worldwide

European Horizons is a global, student-led policy incubator whose mission is to give young people a voice in shaping the future of Europe and of transatlantic relations. We want to achieve our mission by harnessing the energy, idealism, and ambition of young people and by empowering them with the right tools, skill sets, and connections to influence our policy and political institutions now and in the future.

5 Years of tireless efforts and excellence since European Horizons took shape at the Yale College, answering the aim of a handful of students to grow interest in European affairs in the United States.

Throughout the years, European Horizons tirelessly pursued its mission and succeeded to create and maintain its own unique European spirit by bringing people together from different cultures, customs, countries and continents.

A groundbreaking method

European Horizons devises, tests, and advocates for innovative policy ideas to advance European integration. We deliver our mission through:

- A global network of university and chapters engaged in collaborative projects with political, public policy, civil society, and business organizations.
- International events and conferences, inspiring and training our members through projects that have discrete, tangible policy outcomes.
- Regular research projects on technical aspects of the EU Affairs, providing members with new skill sets, knowledge, and connections.
